**Please complete Part A or Part B on the following page.**

\*\*\*\*\*

**Part A – Professional Pyrotechnic Company**

Are you an independent contractor? \_\_\_\_\_ Are you licensed? \_\_\_\_\_

Insurance Company: \_\_\_\_\_ Limit of liability \_\_\_\_\_

(If contracting out the fireworks, an insurance certificate is required. The independent contractor should have at least \$1,000,000 in liability coverage naming the municipality as additional insured and a hold harmless/indemnification waiver for municipality. The municipality needs to review the certificate of insurance to see if the independent contractor is responsible for the cleanup of the unfired shells after the event has ended. In the event the fireworks company is not responsible for the cleanup of unfired shells after the event has ended, the municipality must designate a spotter whose responsibility is to ensure that all shells have detonated. If there are any unexploded shells known, the area must be secured until the unexploded shells have been found and property disposed.)
